How to install WordPress iSMS Authenticator plugin

1. Login your Wordpress website. Download the plugin [here](#). At the left column sidebar, click Plugins > Add New

The screenshot displays the WordPress dashboard's 'Add Plugins' interface. On the left sidebar, the 'Plugins' menu is active, and the 'Add New' option is highlighted with a green box. In the top right corner of the 'Add Plugins' section, the 'Upload Plugin' button is also highlighted with a green box. Below the navigation tabs (Featured, Popular, Recommended, Favorites), a text block explains that plugins extend WordPress functionality. The main content area features a card for the 'Akismet Anti-Spam' plugin, which includes a green logo with a white 'A', a description of its anti-spam functionality, and a rating of 5 stars (862 reviews). The card also indicates '5+ Million Active Installations' and 'Compatible with your' theme.

2. Click Upload Plugin at the top and upload the zip file. After selecting the file, click Install Now

3. Return to the plugins page and click Activate

How to configure WordPress iSMS Authenticator plugin

iSMS OTP Settings

1. Go to iSMS OTP Settings and fill in your iSMS account credentials

iSMS Authenticator Settings

Your credit balance: 4306.0
valid until 22 Oct 2020

iSMS Account Setting
Enter your iSMS credentials

Sender ID	<input type="text" value="companyABC"/>
Username	<input type="text" value="ABC"/>
Admin Phone	<input type="text" value="+60 12-345 6789"/>
Password	<input type="password" value="....."/>

Contact Form ID

1. Check for your contact form's Form ID selector and Submit button ID selector. We recommend using Google Chrome's inspect element

The image shows a contact form with three input fields: "Name *", "Email *", and "Comment or Message *". Below the form is the Chrome DevTools "Elements" panel. The selected element is the form container, and its HTML structure is displayed. Two specific attributes are highlighted with green boxes: the form's ID, "wpforms-form-6", and the submit button's ID, "wpforms-submit-6".

```
<div class="wpforms-container wpforms-container-full" id="wpforms-6">
  <form id="wpforms-form-6" class="wpforms-validate wpforms-form" data-formid="6" method="post" enctype="multipart/form-data" novalidate="novalidate"> => $0
    <noscript class="wpforms-error-noscript">Please enable JavaScript in your browser to complete this form.</noscript>
    <div class="wpforms-field-container">_</div>
    <div class="wpforms-field wpforms-field-hp">_</div>
    <div class="wpforms-submit-container">
      <input type="hidden" name="wpforms[id]" value="6">
      <input type="hidden" name="wpforms[author]" value="1">
      <input type="hidden" name="wpforms[post_id]" value="19">
      <table class="isms-table-otp">_</table>
      <button type="submit" name="wpforms[submit]" class="wpforms-submit" id="wpforms-submit-6" value="wpforms-submit" data-alt-text="Sending..." data-submit-text="Submit">Submit</button>
    </div>
  </form>
</div>
```

2-Factor Authentication Settings

1. Fill in the ID selector's name into the highlighted fields

The screenshot displays the WordPress dashboard with the 'iSMS OTP' menu item selected. The main content area shows the '2-Factor Authentication Settings' page. The settings are as follows:

- Contact Form Selector:** #wpforms-form-6
- Submit Button Selector:** #wpforms-submit-6
- Create Mobile Input Field:** Yes No
- Minutes to resend OTP:** 3
- OTP Template:** Your verification code is: iSMS_OTP_CODE

The 'Contact Form Selector' and 'Submit Button Selector' input fields are highlighted with a green border, indicating they are the focus of the instruction.

OTP Verification SMS

1. The OTP field will be added to your Wordpress website's contact form instantly

The screenshot shows a contact form with the following fields and elements:

- Email ***: A text input field containing "johndoe@gm.com".
- Comment or Message ***: A text area containing "Hi there!".
- Mobile Number:** A dropdown menu showing a flag icon, "+60", and "103904670".
- Enter Verification Code sent**: A text input field containing "848692", which is highlighted with a green border.
- Resend OTP (2:29)**: A blue button.
- Verify OTP**: A blue button.
- Submit**: A light gray button.

2. User will receive OTP verification code SMS

3. This will appear once submitted the form
